

MALO

METALS

MEN EVOLVE.

RINGS DO TOO.

MALO metals redefine men's wedding bands with bold design, premium craftsmanship, and innovative combinations of precious metals that speak to modern strength and timeless style.

Gold

Holds and grows in value — a long-term investment. Long-lasting and easy to resize or repair.

10K

41.7% Pure Gold

14K

58.3% Pure Gold

18K

75% Pure Gold

COLOR OPTIONS

Yellow, white, and rose gold available

TIMELESSNESS

Gold is a timeless metal, and gold wedding bands reflect the timelessness of the love and commitment between spouses.

LUXURY

The inherent value of gold is associated with luxury, making it a symbol of the couple's commitment to a life of shared abundance.

Platinum

Extremely durable and resistant to tarnish.

95% PURITY

COLOR

Naturally white/grey and does not require rhodium plating.

DENSITY

Heavier than the same ring in gold (roughly double.)

RARITY

Platinum is rare, making it a valuable metal for jewelry.

HIGH DURABILITY

Platinum does not tarnish. It is also resistant to wear and damage from exposure to acids such as sulfuric and hydrochloric acids.

HYPOALLERGENIC

Suitable for sensitive skin and most metal allergies.

OTHER APPLICATIONS

Used in medical devices, aerospace, dental, and chemical industries.

Tantalum

Does not break and can be cut off in an emergency.

100% PURITY

Gunmetal grey with a matte or polish finish.

RESISTANT TO CORROSION

Scores 6.5 on the MOHS scale, easily refinished.

UNIQUE COLOR

HYPOALLERGENIC

Suitable for sensitive skin and metal allergies.

OTHER APPLICATIONS

Used in electronics, medicine, aerospace, and military.

Carbon Fiber

Black through and through — color won't wear off.

LIGHTWEIGHT

Exceptionally light for comfortable everyday use.

STRENGTH

Incredibly strong with high tensile strength.

DURABILITY

Resistant to scratching.

HYPOALLERGENIC

Suitable for sensitive skin and metal allergies.

OTHER APPLICATIONS

Used in aerospace and high-end automotive industries.

Titanium

DURABILITY & CORROSION RESISTANT

Exceptional durability, resists wear and corrosion.

LIGHTWEIGHT

Strong yet lightweight for daily comfort.

OTHER APPLICATIONS

Used in aerospace, automotive, medical industries.

VARIETY OF FINISHES

Available in polished, brushed, satin, and matte finishes.

HYPOALLERGENIC

Suitable for sensitive skin and metal allergies.

Black Zirconium

Permanently black through and through — color won't fade.

UNIQUE COLOR

When exposed to high heat, zirconium forms a black oxide layer, giving it its distinctive permanent black color.

LIGHTWEIGHT

Lighter than metals like gold or tungsten, offering comfortable wear.

LOW MAINTENANCE

Resistant to fading and requires minimal upkeep.

HYPOALLERGENIC

Safe for sensitive skin and ideal for those with metal allergies.

OTHER APPLICATIONS

Commonly used in medical implants, alloy in nuclear reactors, and submarines.
